

# black force

100% Water Soluble

## WSP

Ultra Fine Powder

- Reconstitute into liquid concentrate
- N-P-K Fertilizer Coating
- Dry Powder Blending Input

100% Water Soluble

## WSG

Our manufacturing process allows us to produce a superior granular product that delivers all the benefits without binfers, fillers or the mess,

- Reconstitute into liquid concentrate
- Dry Broadcast Application
- Dry N-P-K Blends

Designed for Foliar Application with:

## LO

- Fertilizer
- Pesticides
- Herbicides
- Fungicides

Due to its small size/weight, it can more easily enter the cells of plants. It acts as a natural chelating agent binding to nutrients to create Fulvic Acid rich, nutrient complexes. These complexes are then easily absorbed by the plants' leaves, effectively increasing the plants' uptake of nutrients. It also helps plants absorb needed nutrients that are otherwise inaccessible. In combination with fertilization and other foliar applications, it allows you to improve the efficiency of products being applied to the foliage.
