**CHARACTERISTICS:**

**FINCHIMICA STARTER** is a microgranular inorganic NP fertilizer with added zinc, which acts synergistically with phosphorus in plant metabolism.

The microgranules of **FINCHIMICA STARTER** have a high active surface, which allows complete solubilization of the nutrients and efficient absorption by the crops.

**Particle size distribution:** Granules, 95% of the product passes through a 1.2 mm sieve.

**Components:**

Ammonium diphosphate.  
CAS No. 7722-76-1  
(CMC 1: Substances and mixtures of virgin materials)

**General information:**

For professional use.

**Safety and environmental information:**

Product classified according to Regulation (EC) No. 1272/2008.

**SAFE STORAGE CONDITIONS:**

Avoid exposure to air or moisture for extended periods. Protect the product from exposure to atmospheric agents, for example, rainfall. Store in a cool, dry place between 5 and 30°C. Stored in its original packaging.

**It's not a plant protection product**

**To be used only when needed. Do not exceed recommended application rates.**

**Warnings:** Doses may vary depending on soil fertility, crop productivity and conditions of use.
