

FITOBALSAM

MASTICS FOR VACCINATIONS, PRUNINGS
AND WOUND HEALING

CHARACTERISTICS:

FITOBALSAM is a ready-to-use mastic that has a protective, healing and healing effect on plant wounds caused by pruning, grafting or accidental breakage. The beneficial effect of mastic is guaranteed by a balanced combination of resins that form an elastic membrane, vegetable oils, emollients and healing agents and pH regulators.

INSTRUCTIONS FOR USE:

Use for grafts: For good healing and germination, spread or spread **FITOBALSAM** around the graft.

Use for pruning: After smooth and sloping cutting, apply **FITOBALSAM** with a brush or spatula in an even layer 2-3mm thick. If the cut in the wood is deep, repeat the application after the first layer has dried.

Use to treat old wounds: Remove all rotten wood until it meets the healthy part, cut the edges of the surface with a sharp knife until it is oval in shape and then apply **FITOBALSAM** in an even layer 2-3mm thick all over the cleaned surface. and at the edges. Repeat the application after the first layer has dried.

Duration: 5 years from the date of manufacture.

Precautions:

- The product does not withstand the cold: do not use at temperatures below 0 °C.
- Do not use the product when it is raining.
- For better preservation of the product, close the container tightly after use.
- Do not swallow and keep out of the reach of children.
