

**EC FERTILIZER**

**Micronutrient liquid mixture**

# TOROOT

**A powerful nutritional product for increase of plant growth.**

**TOROOT is a foliar fertilizer that improves the planting and initial growth in different crops.**

**Composition:**

**Water soluble manganese as 7.3% w/w manganese sulfate  
Water soluble zinc as zinc sulphate 3.3% w/w**

**INSTRUCTIONS FOR USE**

Use sufficient water on all crops to ensure adequate coverage.  
**TOROOT** can be applied multiple times to the same crop. It can also be used sequentially with other picolinic acid biostimulators.  
**TOROOT** can be applied through an irrigation system usually at 3 x 1 l/10 hectares from the first week after transplanting or at the beginning of the season at 7-10 day intervals (contains sulphates, so advice on compatibility in mixtures of the stock solution).  
 A foliar application can also be carried out, usually at 2 x 1 l/10 hectares from the 1st week after transplanting or at the beginning of the season with an interval of 10 days between sprays.  
 For improved root and bud growth and establishment of starch and protein stores in the trunk and roots of blueberries and most fruit trees, consider post-harvest (before leaf drop) applications.

**MIX IN A CONTAINER**

Shake well before use. This product is widely compatible with other plant protection products, however consult your agronomist regarding full compatibility.  
 If you apply **TOROOT** to crops under severe stress (such as over-irrigation or drought stress), do not mix it with plant protection products that may cause crop damage and avoid application in extremely hot conditions.

**Information on the use of the product, according to the rules of Good Agricultural Practice:**

Shake well before use.  
 The product is used only in case of recognized need.  
 Do not exceed the indicated doses.

**STORAGE AND DISPOSAL**

Store in a locked chemical cabinet. Dispose of contents and container in accordance with national waste disposal legislation. Store away from sunlight in a cool, dry place. You protect the product from frost.

**ENVIRONMENTAL PRECAUTIONS**

Do not contaminate ponds, waterways or ditches with the used container or its contents.  
 To be used only when there is a recognized need.  
 Do not exceed appropriate dose rates.

**It's not a  
plant protection product**

**NitroFarm SA is certified with EN ISO 9001:2015 Quality Management System  
and EN ISO 14001:2015 Environmental Management System**
