

Ready-to-use aqueous solution (AL)

Guaranteed composition: Active substances:
pyrethrins: 0.0045% w/o + rape seed oil 0.825% w/o,
auxiliary substances: 99% w/w

**Insecticide/Acaricide
to combat various insects
and mites on ornamental plants
and ornamental trees/shrubs.**

INTENDED FOR AMATEUR USERS

Category and mode of action: Insecticide/Acaricide to combat various insects and mites on ornamental plants and ornamental trees/shrubs. It is a mixture of two active substances. It contains the active substance pyrethrins which belongs to category 3A according to IRAC and acts on the nervous system of insects, first causing paralysis and then their death. It also contains the active substance rape seed oil which acts mechanically by covering the pores of the body with an oxygen-impermeable membrane. Thus it prevents the intake of oxygen and moisture and causes suffocation in insects-mites.

Scope of application - Target - Method and time of application - Maximum number of applications per growing season. / Interval of applications in days:

Ornamental trees and shrubs: For Mites, Aphids up to 2 foliar sprays as soon as the first insects/mites appear and repeat after 7 days.

Ornamental trees and shrubs: For Granules up to 3 foliar sprays as soon as the first insects appear and repeat after 7 days.

Ornamental flowers: For Mites, Cicadas, Corns up to 2 foliar sprays as soon as the first insects/mites appear and repeat after 7 days.

Ornamental flowers: For Powdery mildew up to 3 foliar sprays as soon as the first insects appear and repeat after 7 days.

Dosages: The product is a ready-to-use aqueous solution.

Remarks: Before applying the preparation, it should be tested on a small scale.

Special agricultural, phytosanitary or environmental conditions under which the preparation can be used or excluded: 1. To be applied preferably early in the morning or in the afternoon. 2. Do not apply it under high temperature and direct sun exposure. Sprayed plants may have a greasy and oily appearance after using the product. 3. Do not spray when it is windy.

Resistance management: The formulation contains the active substance pyrethrins belonging to category 3A according to IRAC and the active substance rape seed oil belonging to category UNE. It is recommended to rotate with insecticides that do not belong to these groups in

order to avoid the development of resistance.

Safety interval between application and i) sowing or planting of the protected crop: --, ii) sowing or planting of the following crops: --, iii) human or animal access to the crop to which the preparation has been applied: Do not enter the sprayed crop before the spray liquid has completely dried on the plants. Keep children and pets out of the sprayed area for at least 24 hours after spraying.

Evidence of phytotoxicity, cultivar sensitivity and any other side effects on plants or their products: It is not phytotoxic to the crops listed in the spectrum of action and for the recommended application rates.

Method of application: The product is a ready-to-use preparation. It is applied without dilution with a uniform foliar spray ensuring good wetting of both sides of the leaves of the crop. Shake the container well before use.

Method of preparation of the spray liquid: ---

Sprayer cleaning: Empty the spray can completely. Rinse the barrel and all parts of the sprayer three (3) times with clean water until all traces of the product are completely gone.

Combinability: --

Last operation before harvest or before placing on the market in the case of post-harvest uses (days): Ornamental trees and shrubs, Ornamental flowers: --

Storage conditions, time stability of the formulation: In its original closed packaging in a cool, dry and well-ventilated area, protected from direct sunlight, it remains stable for two (2) years from the date of manufacture.

THE INFORMATION WRITTEN IN THIS FORM HAS AN INFORMATIONAL CHARACTER AND DOES NOT SUBSTITUTE IN ANY CIRCUMSTANCES. PLANT PROTECTION PRODUCTS ARE INTENDED FOR USE BY PROFESSIONAL USERS. INSTRUCTIONS FOR USE AND PRECAUTIONS, WRITTEN ON THE LABEL MUST BE OBSERVED. FOR MORE INFORMATION CONTACT THE TECHNICAL DEPARTMENT OF OUR COMPANY OR CONSULT THE LOCAL AGRONOMISTS.
