PFC 6 (B) Non-Microbial Plant Biostimulant

NEW

ag AG Fort®

HEALTH BOOSTER For Plants

AG FORT is a plant biostimulant obtained from the cultivated red seaweed (*Kappaphycus alvarezii*) of the Solieriaceae family. The application of the product improves the yield of crops by increasing their robustness and quality characteristics.

Composition: Organic matter 10.5% w/w minimum.

Ingredients: Aqueous extract from seaweed of the Solieriaceae family, *Kappaphycus alvarezii*.
1 CMC¹: Substances and mixtures of virgin materials. **EC No.:** 955-903-0.

Instructions for use: Crops: Vegetables, Ornamentals, Aromatic and medicinal plants. Application rate: 750 ml/ha. Application method: Foliar spray. Application stage: Vegetative & reproductive stage of development. Number of applications: 3-4.

Claims / Functions of AG FORT: ● Improves NPK use efficiency. ● Increases fruit weight. ● Improves crop yield.

Compatibility: **AG FORT** is readily soluble in water and is compatible with commonly used agricultural supplies, including foliar fertilizers, crop protection products and drip irrigation systems.

Recommended application preparation: Ensure sprayer is free of residue before use. Fill tank 1/4 to 1/2 full with water. Pour **AG FORT** directly into spray tank at recommended rate and mix thoroughly until completely dissolved. Use mechanical or hydraulic means for agitation, if required. Avoid storage of spray solutions.

Application Equipment: All types of application equipment are used for foliar spraying to ensure adequate coverage of the product on the foliage.

The application rates listed are recommendations. Growers are advised to consult their agronomist/advisor to adjust recommendations and avoid over-fertilization. For more specific recommendations, contact the company or its distributor.

Water Amount: Use sufficient water to wet the leaves (generally 500 l/ha).

Additional Information: ● Apply in calm weather conditions, preferably early in the morning. ● Use of a neutral, biodegradable wetting agent is recommended. ● Avoid applications immediately before or after rainfall.

Recommended storage conditions: ● Store in a cool and dry place, away from direct sunlight and frost (above 5°C). ● Keep out of reach of children and animals. ● Keep away from food, drink and animal feed.

Benefits of usage

Reduces leaf curling, chlorosis, mottling, yellow mosaic spots and stunting

Improves fruit colour and yield

Essential regulator of plant defense.

Improves plant's vigour

Improves plant growth

Promotes photosynthesis & reduces chlorosis on leaves

40%

It is not a plant
protection product

OF TOTAL LOSSES OF CROPS
ARE DUE TO VIRAL INFECTIONS.
