

FOR BETTER GROWTH & PRODUCTION PERFORMANCE

NEW

GOSTIM®

CFP 6(B) Non-Microbial Plant Biostimulant

Benefits of usage

1

Growth Enhancement:

Promotes overall plant growth at all stages of their biological cycle.

2

Improves stress resistance:

Helps plants cope better with abiotic stresses, such as extreme temperatures and drought.

3

Increase in productivity:

Contributes to increasing the final yield of the crop.

4

Natural origin:

Derived from seaweed, making it a natural choice for plant nutrition.

5

Universal application:

Can be used safely on all types of plants and crops.

Suitable for use in Organic Agriculture in accordance with the requirements of Regulation (EU) 2021/1165 and Regulation (EU) 2018/848

AG GOSTIM is a plant biostimulant obtained from the cultivated red algae Solieriaceae (*Kappaphycus alvarezii*). The product enhances nutrient use efficiency, growth, yield and quality of crops, including stress tolerance and overall plant vigor.

Composition: Organic matter 20% w/w minimum.

Ingredients: Aqueous extract of marine algae of the Solieriaceae family, *Kappaphycus alvarezii*^{1,2}.

¹CMC1: Substances and mixtures of virgin materials. **EC No.:** 955-903-0.

²CMC2: Plants, plant parts or plant extracts. **EC No.:** 955-903-0.

Directions for use:

Application method: Foliar spray or drip application.

Crops - Dosage - Application Time - Number of Applications - Claims / Functions:

Extensive Crops: 120 grams (gr) per ha. 2-4 applications at the vegetative growth stage and early reproductive stage. i) Improving the efficiency of NPK use. ii) Increasing the biomass of the foliage. iii) Improving the yield per acre. iv) Increasing the weight of the grains.

Vegetables, Ornamental, Aromatic and Medicinal Plants: 120 grams (gr) per ha. 2-4 applications at the vegetative growth stage and early reproductive stage. i) Improving the efficiency of NPK use. ii) Improving the yield per acre. iii) Increasing the weight of the fruits.

Trees & Perennials: 120-140 grams (gr) per ha. 4-6 applications in the initial reproductive stage and fruit development stage. i) Improves yield per acre. ii) Increases fruit weight.

Compatibility: **AG GOSTIM** is easily dissolved in water and is compatible with most agricultural products, including foliar fertilizers, plant protection products and drip irrigation systems.

The product application rates are recommendations. We recommend that farmers seek advice from their agricultural consultant to adapt the application rates to their crops and avoid over-fertilization. Contact the company or distributor for more specific recommendations.

Recommended Application Preparation: For Foliar Spraying - Ensure sprayer is free of residue before use. Fill tank 1/4 to 1/2 full with water. Pour **AG GOSTIM** directly into spray tank at recommended rate and mix thoroughly until completely dissolved. Use mechanical or hydraulic means for agitation, if necessary. Avoid storing spray solutions for extended periods of time.

For Irrigation - Fill tank 1/4 to 1/2 full with water. Add **AG GOSTIM** directly into tank at recommended rate and mix thoroughly until completely dissolved. Use mechanical or hydraulic means for agitation, if necessary. Avoid storing solutions for extended periods of time.

Application Equipment: All types of application equipment are used for foliar spraying to provide adequate coverage of the product on foliage. The product can also be used appropriately for soil irrigation/drip.

Water Amount: Use sufficient water to thoroughly wet the leaves (generally 50 liters/acre) or in accordance with standard agricultural practices.

Additional Information: ● Apply in clear weather, preferably early in the morning. ● The use of a neutral, biodegradable wetting agent in the spray solution is recommended. ● **AG GOSTIM** is hygroscopic and should be used as soon as the container is opened. Avoid applications immediately before or after rainfall.

Recommended storage conditions:

- Store in a cool, dry place, away from direct sunlight and frost (store above 5°C).
- Keep the product out of reach of children and animals.
- Store away from food, drink and animal feeding stuffs.

It is not a plant protection product
