

PACKAGE: 5Kg

18-44-0 (w/v) • 12-29,3-0 (w/w)

GREEN LIFE GEL

PFC: PFC 1(C)(I)(b)ii: COMPOUND LIQUID INORGANIC MACRONUTRIENT FERTILIZER.

Ingredients: Urea¹ (Cas No 57-13-6), Ammonium sulfate¹ (Cas No 7783-20-2), Phosphoric acid¹ (Cas No 7664-38-2).

¹CMC1: VIRGIN SUBSTANCES AND MIXTURES.

Contains

Total Nitrogen (N) :

Uric:

Ammoniacal (NH₄⁺):

Total phosphorus pentoxide (P₂O₅):

Water-soluble phosphorus pentoxide (P₂O₅):

pH (1\100) : 2,0 - 3,0

Density g/cm³: 1,45 - 1,55

Electrical conductivity mS (1\1000): 1,1

w/w	w/v
12,0%	18,0%
9,3%	14,0%
2,6%	4,0%
29,3%	44,0%
29,3%	44,0%

Application method: Fertigation and Foliar.

General information - Functions: ● Paste with a high phosphorus content, which is highly soluble in water. ● High acidity to reduce alkalinity and release nutrients from previous applications. Chemical mixture, 100% homogeneous. ● Suitable for root development and for the flowering stage. ● Contains a high concentration of organic matter that improves soil properties and releases nutrients for microorganisms that benefit the plant.

Use only in case of recognized need.
Do not exceed the application dosage.

FOR PROFESSIONAL USE ONLY.

Contact the company for more specific recommendations.

Compatibility: Compatible with fertilizers. However, a test is recommended before final application.

Precautions: ● Reclose partially used containers. ● Dispose of empty packaging materials in accordance with applicable regulations.

POISON CENTER TEL: 210-7793777

Recommended storage conditions: ● Store away from direct sunlight in dry and ventilated areas. ● Avoid frequent temperature fluctuations during storage. ● Keep partially used packages tightly closed. ● Keep out of reach of children. ● Dispose of empty packages in accordance with applicable legislation.

****The physical form of the product may change if stored below 7°C, but this does not affect its effectiveness or chemical properties. Its normal form will be restored when exposed to normal temperatures between 7 and 30°C.**

Instructions for intended use and dosage:

Cultivation - Application rate (hydration - foliar) - Application time:

Vegetables (Greenhouse & Field): Fertigation with 30-60 kg / ha (greenhouse) & 12-15 kg / ha (field). Foliar with 150-250 gr. / 100 liters of water. During root growth and flowering.

Large-crop plants: Fertigation and Foliar with 10-12kg / ha. In the 1st month.

Livestock plants: Fertigation and Foliar with 10-12kg / ha. In the 1st month.

Fruit trees: Fertigation with 12-15 kg / ha. Foliar application with 150-250 gr. / 100 liters of water. At the flowering stage.

Ornamental plants: Fertigation with 10-12 kg / ha. Foliar application with 150-250 gr. / 100 liters of water. In case of need.

Nurseries: Fertigation and Foliar application with 100-150 gr. / 100 liters of water. After the appearance of true leaves.

**It is not a
plant protection
product**
