

SUMO ^{CE}

FERTILIZER CE

A specialized Calcium Carbonate fertilizer.
Used in all crops.

Analysis w/w (%):
Calcium Carbonate: 61,21%
Specific Gravity: 1.47 g/cm³

DOSAGE

For hard water: Approximately 75-100 ml / 100 liters of water.
For semi-hard water: Approximately 20-30 ml / 100 liters of water.
For soft water: Approximately 10-15 ml. / 100 liters of water.

WHY IS THE USE OF SUMO NECESSARY

It is known that most pesticides are extremely sensitive to pH greater than 7, resulting in their hydrolysis and loss of part of their activity.

By using **SUMO** we create the ideal aqueous environment for the stability of the active substances.

SUMO must be added first to the spray liquid and then the preparations are added.

SUMO PROPERTIES

SUMO can be used to improve the stability of the spray solution, reduce sedimentation or inactivation phenomena and balance the ionic conditions of the water.

NitroFarm SA is certified with EN ISO 9001:2015 Quality Management System
and EN ISO 14001:2015 Environmental Management System
